

# CMSC436 Project Milestone 1 Document: Board Game Tracker

## *Project Team 1*

- Sash Sujith
- Daniel Heffron

## Tasks Accomplished:

- Built basic game template which allows a user to add a player, game name, and game category
- Created data structures for game sessions and players
- Figured out how to save sessions and players to a file in local memory
- Implemented feature which allows users to add a description for a session
- Created basic UI to display sessions

## Things to do next:

- Implement in-app timer
- Fix structure of app with navigation view functionality
- Add avatar/profile picture feature for when the user creates a new player
- Clean up UI, implement a color scheme
- Take a stab at stretch goals
